To,
The Hiring Manager
Atishay Limited

Subject: Application for Software Developer Position

Dear Hiring Manager,

I am writing to apply for the **Software Developer** position at **Atishay Limited**. I am an MCA graduate from SPPU, Pune with 7 months of internship experience building production-level application modules using Java, Spring Boot, React, and MySQL.

During my internship at SetTribe IT Solutions, Pune, I worked within Agile sprint cycles to develop full-stack ERP application components. I designed and tested RESTful APIs with JWT authentication, role-based access controls, and database optimization. I am comfortable working on Linux environments using Git CLI, Maven, and Bash scripting.

Key highlights:

- **Backend:** Built multi-tenant systems using Spring Boot, Hibernate, and MySQL with strategic indexing that improved query performance by 40%.
- **Frontend:** Developed responsive interfaces using React.js and Angular with component-based architecture.
- **Python & Automation:** Created ML pipelines using Scikit-learn and automated Linux system monitoring utilities using Python, Psutil, and Bash.
- **Databases:** Worked with MySQL, PostgreSQL, and MongoDB — comfortable with schema design and query optimization.
- **AI Tools:** I use GitHub Copilot and ChatGPT daily for code generation, debugging, and testing.

I am available to join within 15 days and am open to relocation if required. I would welcome the opportunity to discuss how I can contribute to the team at Atishay Limited.

Thank you for your time and consideration.

Best regards,

Pratik Nanaso Raut
