PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in Python, AI/ML fundamentals, Java full-stack development, SQL databases, and Linux system programming. Built ML classification and regression models using Scikit-learn and Pandas. Experienced in developing RESTful APIs with Spring Boot, building frontend interfaces with React and Angular, and automating Linux workflows using Python and Bash scripting. Proficient in AI productivity tools (ChatGPT, GitHub Copilot) for code generation and workflow optimization in Agile environments.

TECHNICAL SKILLS

AI/ML & Python: Python, Scikit-learn, Pandas, NumPy, Matplotlib, ML Classification & Regression, Model Evaluation

AI Tools: ChatGPT, GitHub Copilot, Prompt Engineering, AI-Assisted Code Generation, Generative AI Fundamentals

Full-Stack & Frontend: Java, Spring Boot, React.js, Angular, JavaScript (ES6+), HTML5, CSS3, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, Hibernate, JPA, Schema Design, SQL Query Optimization

Linux & Scripting: Bash Scripting, Linux (Ubuntu), Shell Automation, Psutil, OS Module, /proc Filesystem, POSIX System Calls

Tools & DevOps: Git, GitHub, Postman, Maven, VS Code, IntelliJ IDEA, Linux CLI, JWT, Spring Security

PROFESSIONAL EXPERIENCE

SetTribe IT Solutions

Feb 2026 – Jul 2026

Software Developer Intern

Pune, Maharashtra

- Developed full-stack ERP application modules using React frontend and Java Spring Boot backend within Agile sprint cycles.
- Designed and tested RESTful API endpoints with JWT authentication, DTO patterns, and role-based access controls (RBAC).
- Managed MySQL database integrations, wrote optimized SQL queries, and maintained data validation pipelines.
- Utilized AI productivity tools (GitHub Copilot, ChatGPT) for code generation, API testing, and rapid defect troubleshooting.
- Operated on Linux development environments using Git CLI, Maven build pipelines, and Bash automation scripts.

PROJECTS

Titanic Survival Prediction – ML Classification | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Joblib

- Built end-to-end ML classification pipeline with data preprocessing, categorical encoding, and missing value imputation.
- Trained Logistic Regression model and evaluated using accuracy score, confusion matrix, and cross-validation metrics.
- Serialized trained model using Joblib for persistent inference, enabling automated prediction on new unseen datasets.

Advertising Sales Prediction – Regression & EDA | Python, Pandas, Matplotlib, Scikit-learn, NumPy

- Performed exploratory data analysis with Matplotlib visualizations to identify feature correlations driving sales metrics.
- Trained Multiple Linear Regression model and evaluated using MSE, RMSE, and R-squared performance metrics.
- Implemented train-test splitting and feature selection pipelines for reproducible ML experimentation workflows.

PayStride – Multi-Tenant Payroll Management System | Java, Spring Boot, MySQL, Hibernate, REST API, JWT

- Architected multi-tenant RBAC system using Spring Security and JWT, enforcing complete tenant data isolation across all API endpoints.
- Optimized MySQL query execution through strategic indexing and schema normalization, reducing average response latency by 40%.
- Engineered BigDecimal payroll computation engine handling statutory deductions (PF 12%, ESI 0.75%) with precision arithmetic.

Platform Surveillance System – Linux Resource Monitor | Python, Psutil, Schedule, Logging, Bash

- Developed Python automation utility using Psutil and Schedule to monitor system CPU, RAM, disk, and network utilization.
- Implemented process scanning and diagnostic logging to record process metadata including PID, CPU, and memory consumption.
- Integrated scheduled execution via cron jobs and robust exception handling to maintain continuous operational stability.

Automated Disk Sanitizer – System Diagnostic Utility | Python, OS Module, Hashlib (MD5), Bash, Linux CLI

- Engineered Python utility for automated system resource monitoring, process scanning, and duplicate file detection and cleanup.
- Implemented MD5 cryptographic hashing for file deduplication across directory trees with recursive filesystem traversal.
- Built interactive CLI routines with diagnostic logging and Bash integration for automated Linux system maintenance tasks.

EDUCATION

Dnyansagar Institute of Management and Research, Pune (SPPU)

2024 – 2026

Master of Computer Applications (MCA) – CGPA: 7.32

Pune, Maharashtra

C.T. Bora College, Shirur (SPPU)

2021 – 2024

Bachelor of Computer Applications (BCA) – Marks: 73.34%

Pune, Maharashtra

CERTIFICATIONS

- MongoDB Certified:** Search With MongoDB | **Python Certification**
