PROFESSIONAL SUMMARY

MCA graduate with strong technical proficiency in Python programming, Object-Oriented Programming (OOP), RESTful API development, and SQL database management. Experienced in building full-stack web backends using Django and Flask, developing automated Python utilities for system surveillance and data processing pipelines, and implementing Machine Learning classification models. Skilled in MySQL schema design, query optimization, Git version control, unit testing, and Linux CLI environments. Seeking to leverage strong scripting and backend problem-solving skills as a Python Developer Intern.

TECHNICAL SKILLS

Programming Languages: Python 3 (OOP, Data Structures), SQL, JavaScript (ES6+), HTML5, CSS3

Python Libraries & Frameworks: Django, Flask, Pandas, NumPy, Scikit-learn, RESTful APIs

Databases & Storage: MySQL, SQLite, Schema Design, SQL Query Optimization, Django ORM

Scripting & Data Pipelines: OS Module, Hashlib, Psutil, File I/O, Regular Expressions (Regex), Stream Processing

Tools & Environment: Git, GitHub, Postman, VS Code, Linux (Ubuntu), Bash Scripting, Agile SDLC, Unit Testing

PROFESSIONAL EXPERIENCE

SetTribe IT Solutions

Feb 2026 – Jul 2026

Software Developer Intern

Pune, Maharashtra

- Engineered backend RESTful API endpoints and application features using Python, React.js, and MySQL databases.
- Designed and implemented request payload validation middleware, structured exception handling, and JWT authentication.
- Architected relational MySQL database schemas, wrote optimized SQL queries, and verified overall data persistence integrity.
- Executed systematic unit testing, API profiling using Postman, and debugging to resolve pre-release backend issues.
- Collaborated actively in Agile sprint meetings, leveraging Git for structured branching, code reviews, and version control.

PROJECTS

StudyTracker – Student & Academic Management Portal | Python, Django, MySQL, REST APIs, HTML/CSS

- Engineered a RESTful web backend using Django to manage student profiles, course enrollments, and academic evaluations.
- Designed relational MySQL database schemas with Django ORM models and optimized SQL queries for data persistence.
- Implemented request payload validation middleware, custom exception handling, and role-based endpoints for secure operations.

Platform Surveillance & System Disk Sanitizer | Python, Psutil, OS Module, Hashlib (MD5), File I/O

- Built a Python system automation utility using Psutil and OS module to monitor CPU, RAM, and disk usage in real-time.
- Developed recursive file search and duplicate detection algorithms utilizing MD5 cryptographic checksums with stream processing.
- Integrated diagnostic logging and interactive CLI cleanup controls to recover disk space and maintain platform reliability.

Automated Data Ingestion & Log Scanner Utility | Python, Pandas, Regex, File I/O, Bash Scripting

- Developed a Python automation script to parse, extract, and clean structured metrics from raw application log files.
- Applied regular expressions (Regex) and Pandas dataframes for batch data processing, transformation, and error categorization.
- Configured automated report generation and error summary exports to streamline system monitoring workflows.

Breast Cancer Diagnostic & Predictive Classification | Python, Scikit-learn, Pandas, NumPy, Machine Learning

- Built predictive classification models in Python using Logistic Regression, Decision Trees, and Random Forest algorithms.
- Performed data preprocessing, feature scaling, and missing value handling on medical dataset records using Pandas and NumPy.
- Evaluated model performance metrics (Accuracy, Precision, Recall, F1-Score) and implemented Voting Ensemble classifiers.

EDUCATION

Dnyansagar Institute of Management and Research, Pune (SPPU)

2024 – 2026

Master of Computer Applications (MCA) – CGPA: 7.32

Pune, Maharashtra

C.T. Bora College, Shirur (SPPU)

2021 – 2024

Bachelor of Computer Applications (BCA) – Marks: 73.34%

Pune, Maharashtra

RELEVANT COURSEWORK & COMPETENCIES

- Core Computer Science:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems.
- Database & Web Concepts:** Relational Database Management Systems (RDBMS), SQL Query Design, REST Architecture.
