CAREER OBJECTIVE

MCA graduate with hands-on experience in JavaScript, DOM manipulation, dynamic UI development, and system automation scripting. Built real-time event-driven web applications using Angular and Socket.io with WebSocket communication, and automated system monitoring utilities using Python. Seeking to apply scripting, visualization, and problem-solving skills in industrial automation and HMI display development.

TECHNICAL SKILLS

Programming / Scripting: JavaScript (ES6+), HTML5, CSS3, Python, Java

Frontend & Visualization: Angular, React.js, DOM Manipulation, Event Handling, Dynamic Display Development, Component Architecture

Real-Time & Networking: WebSocket (Socket.io), REST APIs, TCP/IP Socket Programming

Automation & Monitoring: Python (Psutil, Schedule, OS Module), System Resource Monitoring, Process Scanning, Diagnostic Logging

Databases: MySQL, PostgreSQL, MongoDB, SQL Query Optimization, Schema Design

Tools & Environment: Git, GitHub, VS Code, Maven, Postman, Linux (Ubuntu), Agile/Scrum

PROFESSIONAL EXPERIENCE

SetTribe IT Solutions

Feb 2026 – Jul 2026

Software Developer Intern

Pune, Maharashtra

- Developed dynamic frontend interfaces using React.js with JavaScript event handling, DOM manipulation, and component-based architecture.
- Built and tested RESTful API endpoints with JWT authentication, input validation, and role-based access controls.
- Managed MySQL database integrations, wrote optimized SQL queries, and maintained data validation pipelines.
- Collaborated in Agile/Scrum sprint cycles using Git for version control, code reviews, and status reporting.

PROJECTS

Event Hub – Real-Time Event Coordination Portal | Angular, JavaScript, Node.js, Socket.io, MongoDB

- Integrated Socket.io WebSocket layer for real-time event status broadcast to connected clients with sub-second latency.
- Designed modular Angular component architecture with dynamic UI updates, event-driven state changes, and search functionality.
- Implemented event registration workflows with Express.js REST APIs and MongoDB document persistence.

Restaurant Record App – Full-Stack CRUD Application | Angular, JavaScript, Node.js, Express.js, MongoDB

- Developed CRUD REST APIs using Express.js and MongoDB with JWT token-based authentication for secure data access.
- Implemented Angular lazy-loading and service abstraction to optimize frontend performance and component reuse.
- Designed modular routing architecture supporting role-based visibility and dynamic content rendering.

Platform Surveillance & Disk Sanitizer – Automation Suite | Python, Psutil, OS Module, Hashlib, Bash

- Developed Python automation utility using Psutil and Schedule to monitor system CPU, RAM, disk, and network utilization in real-time.
- Implemented process scanning and diagnostic logging to record process metadata including PID, CPU, and memory consumption.
- Engineered duplicate file detection using MD5 cryptographic hashing with recursive filesystem traversal and automated cleanup.
- Built interactive CLI routines with cron-based scheduling, Bash integration, and exception handling for Linux system maintenance.

EDUCATION

Dnyansagar Institute of Management and Research, Pune (SPPU)

2024 – 2026

Master of Computer Applications (MCA) – CGPA: 7.32

Pune, Maharashtra

C.T. Bora College, Shirur (SPPU)

2021 – 2024

Bachelor of Computer Applications (BCA) – Marks: 73.34%

Pune, Maharashtra

CERTIFICATIONS

- **MongoDB Certified:** Search With MongoDB | **Python Certification**
